Smart Contract 101

Zhun Shen, Co-BUILDer of CyberMiles

Smart Contract - Origin

“I call these new contracts “smart”, because they are far more functional than their inanimate paper-based ancestors. No use of artificial intelligence is implied. A smart contract is a set of promises, specified in digital form, including protocols within which the parties perform on these promises”

– Nick Szabo, 1996

Smart Contract - Current

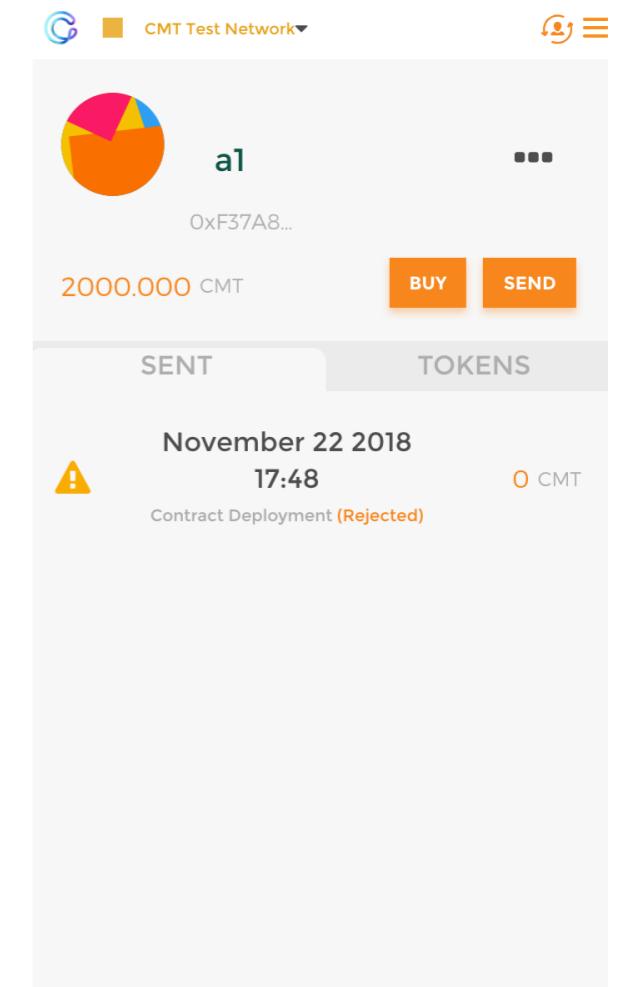

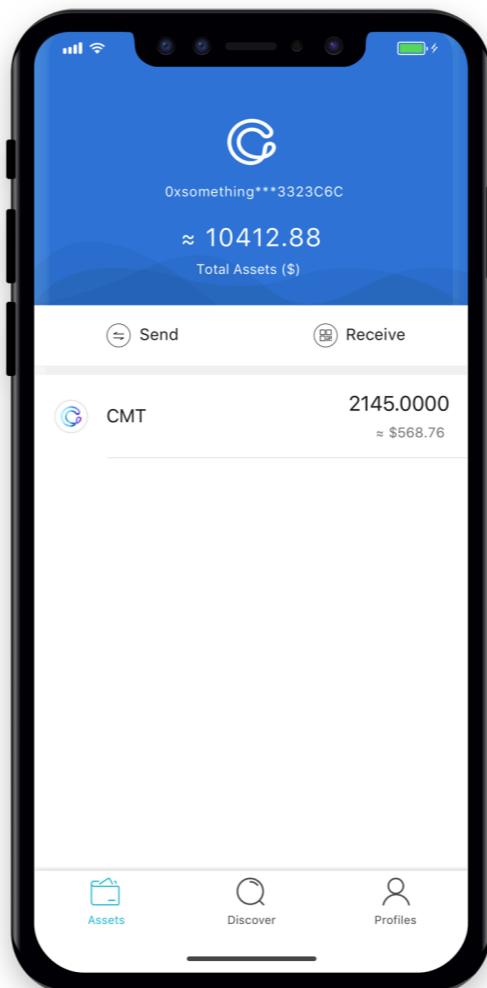

Smart contracts are programs that are executed inside a peer-to-peer network where nobody has special authority over the execution and thus they allow to implement tokens of value, ownership, voting and other kinds of logics.

Gas

To run an application on Ethereum
YOU NEED GAS

DApp

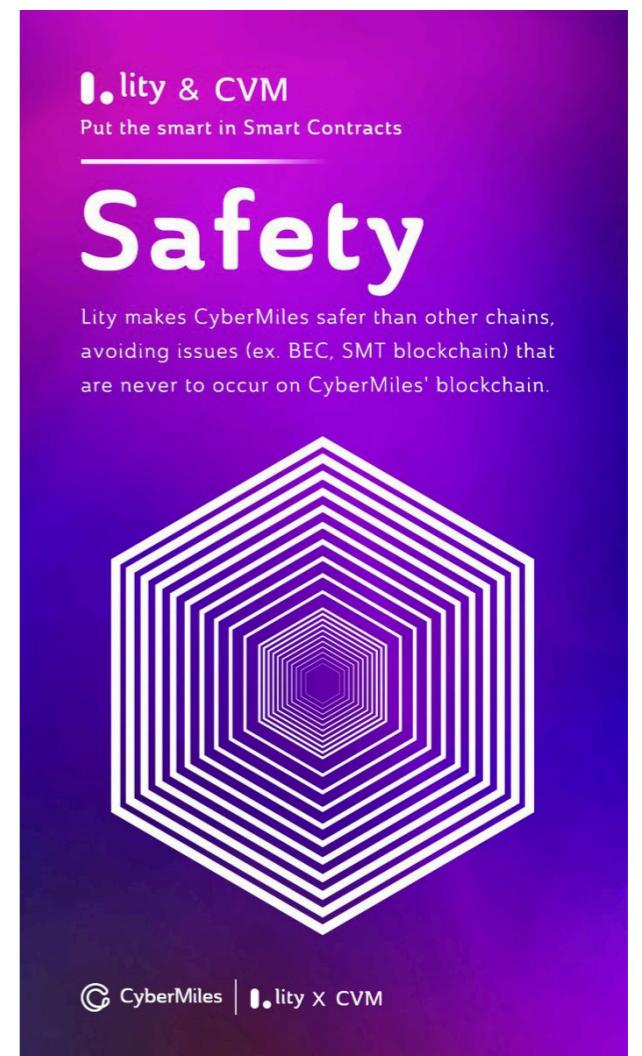

What is CryptoKitties?

CryptoKitties is a game centered around breedable, collectible, and oh-so-adorable creatures we call CryptoKitties! Each cat is one-of-a-kind and 100% owned by you; it cannot be replicated, taken away, or destroyed.
